INFRARED PHYSICS & TECHNOLOGY

Editors-in-Chief:

F. K. KNEUBÜHL — ETH, Infrared Physics Laboratory, CH-8093 Zürich, Switzerland

W. L. WOLFE — Optical Science Center, University of Arizona, Tucson, AZ 85721, U.S.A.

Managing Editor:

H. N. RUTT — Department of Electronics and Computer Science, University of Southampton, Highfield, Southampton SO17 1BJ, England

Editor Emeritus:

T. S. MOSS — 2 Shelsley Meadow, Upper Colwall, Malvern, Worcestershire WR13 6PX, England

Editorial Board

Publishing Office

Elsevier Science Ltd, Bampfylde Street, Exeter EX1 2AH, England
[*Tel.* Exeter (01392) 51558; *Fax* (01392) 425370]. Production Editor: J. A. TURNER

Subscription and Advertising Offices

North America: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.
Rest of the World: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, England
[*Tel.* Oxford (01865) 843000; *Fax* (01865) 843010]

Annual Subscription Rates 1995

Annual Institutional Subscription Rates 1995: North, Central and South America, US$820.00; Rest of World, £550.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. *Note*: frequency changes to 7 issues/annum in 1994.

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform are available direct from Elsevier Science offices.

Publication Frequency: 7 issues per annum in February, March, April, June, August, October and December

LIST OF CONTENTS

Number 1

T. S. Moss	III	Preface
G. Burrell	V	A tribute to Trevor Moss
Review **Antoni Rogalski**	1	New trends in infrared detector technology
S. N. Chesnokov, D. E. Dolzhenko, I. I. Ivanchik and D. R. Khokhlov	23	Far infrared high-performance lead telluride-based photodetectors for space-born applications
Kazuo Kikuchi	33	An uncooled FIR detector using the avalanche injection effect
N. V. Joshi, Willem van der Vleuten, J. H. Wolter and A. M. Gerrits	41	Detection of a combination of defect activated phonon modes in AlAs/GaAs superlattice structure by Fourier Transform Spectroscopy
M. Agne, A. Lambrecht, U. Schießl and M. Tacke	47	Guided modes and far-field patterns of lead chalcogenide buried heterostructure laser diodes
B. P. Sharma, S. C. Goyal and R. P. Goyal	59	Evaluation of the Moelwyn–Huggesh parameter and temperature derivatives of compressibility of mixed alkali halides
C. N. Mishra, R. P. Goyal, S. C. Goyal and B. R. K. Gupta	63	Thermodynamical properties of fluorite structure crystals
J. Knittel, D. P. Scherrer and F. K. Kneubühl	67	The first optical-free-induction-decay system with a tunable single-mode high-pressure CO_2 laser
Research Note **H. Alius and G. Dodel**	73	Far-infrared modulation techniques based on optical excitation of semiconductors
Letter to the Editors **Zhou Guanshan**	79	Derivation of the $(R_0A)_{T_i}$ product in N^+–P $Hg_{1-x}Cd_xTe$ photodiodes (A comment on the paper by A. Rogalski, *Infrared Phys.* Vol. 28, No. 3, pp. 139–152 (1988))
Forthcoming Conferences	i	

Number 2/3

PROCEEDINGS OF THE FIFTH INTERNATIONAL CONFERENCE ON INFRARED PHYSICS (CIRP 5)

Fritz K. Kneubühl	VII	Editorial
Steven V. W. Beckwith	81	Progress on IR observations of circumstellar disks

R. Durrer	83	Early reionization in cosmology
Thérèse Encrenaz	95	Solar-System studies in the infrared range: recent developments and future plans
G. G. Fazio	107	Infrared array detectors in astrophysics
M. Hack and L. Denizman	119	The near-infrared spectrum of U Sagittae at primary eclipse
E. E. Haller	127	Advanced far-infrared detectors
P. M. Harvey, S. L. Balkum and J. L. Monin	147	Infrared speckle interferometry with 2-D arrays
P. M. Harvey and E. F. Erickson	153	SOFIA—Stratospheric Observatory for Infrared Astronomy
F. Herrmann, N. Geis, R. Genzel, S. C. Madden, A. Poglitsch, G. J. Stacey and C. H. Townes	161	Far-infrared studies of the Orion Nebula
Klaus-Werner Hodapp	167	Star formation in young embedded clusters: new observational results using near-infrared detector arrays
William F. Hoffmann, Giovanni G. Fazio, Kandiah Shivanandan, Joseph L. Hora and Lynne K. Deutsch	175	Astronomical observations with the Mid-InfraRed Array Camera, MIRAC
Daniel Huguenin	195	Design and performance of stratospheric balloon-borne platforms for infrared astrophysical observations
H. U. Käufl, R. Jouan, P. O. Lagage, P. Masse, P. Mestreau and A. Tarrius	203	TIMMI, ESO's new 10 μm camera/spectrometer
Martin F. Kessler and Paul Barr	211	The Infrared Space Observatory (ISO)
G. N. Schenker, A. P. Holenstein, F. A. Pepe, D. Huguenin and F. K. Kneubühl	221	Balloon-borne imaging of the Cygnus-X region at 260 μm wavelength
Theodor Kostiuk	243	Physics and chemistry of upper atmospheres of planets from infrared observations
A. F. Krupnov	267	Molecules of astrophysical interest: recent submillimeter and infrared spectra
J. M. Lamarre, F. Pajot, J. P. Torre, G. Guyot, J. P. Bernard, A. De Luca, M. Giard, J. Mangin, R. Peyturaux, J. L. Puget, G. Serra, F. Boulanger, X. Désert, I. Ristorcelli, G. Jegoudez, H. Lagardère, J. Leblanc, R. Pons, G. Recouvreur, M. Barthelemy, C. Bourguignon, J. P. Crussaire, G. Dambier, L. Delille, E. Korczak, J. P. Lepeltier, B. Leriche, C. Lizambert, J. Narbonne, C. Plaisant, J. Reigner, J. C. Renault and C. Rioux	277	SPM, a submillimeter photometer for PRONAOS
Frank J. Low and Roc M. Cutri	291	Infrared cirrus, what have we learned?
D. Lutz, R. Genzel, A. Krabbe, M. Blietz, S. Drapatz, P. P. van der Werf, F. Najarro and D. J. Hillier	303	Excitation of the inner pc of the Galactic Center: results from near-infrared spectroscopy

S. C. Madden, N. Geis, R. Genzel, F. Herrmann, A. Poglitsch, G. J. Stacey and C. H. Townes	311	The interstellar medium of galaxies as seen through images of the 158 μm [CII] line
B. Maffei, F. Pajot, T. G. Phillips, D. Benford, E. Caux, R. Gispert, N. Halverson, T. Hunter, G. Jegoudez, M. Josse, J. M. Lamarre, J. P. Lepeltier, H. Moseley, A. Origné, S. Petuchowsky, M. Rabottin, J. C. Renault, C. Rioux, G. Serabyn and N. Wang	321	A medium resolution ground based submillimeter spectrometer
John C. Mather	331	Infrared measurements from the Cosmic Background Explorer (COBE)
P. G. Mezger	337	mm/submm-Bolometer observations of star-forming regions
A. F. M. Moorwood and E. Oliva	349	Infrared spectroscopy of starburst and Seyfert galaxies
H. Mutschke, B. Begemann, J. Dorschner and Th. Henning	361	Infrared data of sulphides of interstellar dust importance
Antonella Natta	375	Circumstellar matter in Herbig AeBe stars
Philippe Normand, Daniel Rouan, D. Tiphène and F. Lacombe	383	The diffuse ISM in two edge-on galaxies—NGC891 and M82—images in the 3.3 μm PAH feature
H. Okuda, T. Nakagawa, H. Shibai, Y. Doi, Y. Y. Yui, K. Mochizuki, T. Nishimura and F. J. Low	391	Large scale [CII] line emission in the galaxy observed by stratospheric balloons
Göran Pilbratt	407	FIRST—Far InfraRed and Submillimetre Space Telescope
A. Poglitsch, N. Geis, R. Genzel, A. I. Harris, J. M. Jackson, T. Krenz, S. C. Madden, G. J. Stacey and C. H. Townes	419	Infrared observations of the center of the Galaxy
P. L. Richards, A. Clapp, M. Devlin, M. Fischer, C. Hagmann, W. Holmes, A. Lange, S. Tanaka, P. Timbie, J. Gundersen, P. Meinhold, P. Lim, P. Lubin and G. Smoot	431	MAX searches for intermediate-scale anisotropy of the cosmic microwave background
P. R. Roelfsema, T. de Jong and F. Lahuis	439	The heritage of the IRAS Low Resolution Spectrograph
H. P. Röser, H. W. Hübers, T. W. Crowe and W. C. B. Peatman	451	Nanostructure GaAs Schottky diodes for far-infrared heterodyne receivers
H. Rothermel, B. Plathner, K. H. Gundlach, M. Aoyagi and S. Takada	463	Antenna-coupled superconducting contacts in submillimeter and FIR astronomy
R. Schieder	477	High resolution diode laser and heterodyne spectroscopy with applications toward remote sensing
B. Stecklum, Th. Henning, A. Eckart and R. Hofmann	487	NIR high-resolution imaging of young stars
J. Stutzki	493	Molecular cloud structure traced by submm- and far-IR spectral line observations
C. H. Townes, M. Bester, W. C. Danchi, C. G. Degiacomi and L. J. Greenhill	503	An IR spatial interferometer at 10 μm wavelength and measurement of stellar dust shells

Heinrich J. Völk and Cong Xu 527 Correlation of the radio continuum intensity with the FIR luminosity and its implication for dust heating sources and physical processes in galaxies

Michael W. Werner 539 The Atlas SIRTF

Gisbert Winnewisser 551 Submillimeter and infrared astronomy: recent scientific and technical developments

H. Zinnecker and M. J. McCaughrean 569 The impact of near-infrared array imaging on studies of star-forming regions

i Index of Contributors

Number 4

R. K. Bhan and S. K. Lomash 579 Rapid measurement of threshold non-uniformity in CCD multiplexers for hybrid focal plane arrays

Zoran Djurić, Aleksandar Vujanić and Zoran Jakšić 585 Spectral characteristics of high temperature IR photodetectors with electromagnetic carrier depletion

Y. Li and D. J. Adams 593 Experimental studies on the performance of $Hg_{0.8}Cd_{0.2}Te$ photoconductors operating near 200 K

E. Ferdinandov, V. Tsanev and B. Todorov 597 The combined influence of diffraction coherency and atmospheric turbulence on the contrast of the registered images in infrared remote sensing

P. Hervé and L. K. J. Vandamme 609 General relation between refractive index and energy gap in semiconductors

P. N. Dixit, S. P. Varma, O. S. Panwar, Tanay Seth, D. Gupta and R. Bhattacharyya 617 Infrared studies of hard hydrogenated amorphous carbon (a-C:H) film and the effect of argon plasma treatment

E. Espinosa, B. Wyncke, F. Bréhat, S. Veintemillas, E. Molins and C. Lecomte 625 Far-infrared reflectivity spectra of L-arginine phosphate monohydrate (LAP)

Marie Jakoubková, Zdeněk Bastl, Pavel Fiedler and Josef Pola 633 IR laser thermolysis of tetramethylgermane for CVD of germanium

Dane Bicanic, Anikó M. Sólyom, György Z. Angeli, Hillion Wegh, Maarten Posthumus and Henk Jalink 637 The extent of unwanted infrared photoacoustic signals from polymer sampling tubings exposed to ultraviolet radiation

Sucharita Sinha 645 Gain saturation in single pass and double pass optically pumped laser amplifiers

J. Knittel, D. P. Scherrer and F. K. Kneubühl 655 Plasma-shutter for far-infrared laser radiation

Number 5

Research Papers

J. F. Siliquini, C. A. Musca, B. D. Nener and L. Faraone 661 Performance of optimized $Hg_{1-x}Cd_xTe$ long wavelength infrared photoconductors

R. K. Sharma, D. Verma and B. B. Sharma	673	Observation of below band gap photoconductivity in mercury cadmium telluride
Kamsul Abraha and David R. Tilley	681	Theory of far-infrared reflectivity and surface magnetic polaritons of rare-earth magnets
J. A. A. Engelbrecht	701	Modelling the reflectance of silicon
M. Saito, T. Kano, T. Seki and M. Miyagi	709	Microwire arrays for infrared polarizers
Igor I. Taubkin, Michael A. Trishenkov and Nikolai V. Vasilchenko†	715	Minimum temperature difference detected by the thermal radiation of objects
S. Sazhin, M. Makhlouf, D. Toebaert and C. Leys	733	An approximation for the electron energy distribution function in CO_2 laser discharges
Laboratory Note		
S. P. Varma and D. Gupta	739	Measurement of true transmittance of samples mounted on an aperture plate
Forthcoming Conferences	i	

Number 6

Research Papers		
G. Carelli, N. Ioli, A. Moretti, G. Moruzzi, F. Strumia, S. Zhao, R. M. Lees and R. R. J. Goulding	743	$CH_3{}^{18}OH$: FIR laser line frequency measurements and assignments
R. Alexandrescu, B. Dragnea, I. Morjan and M. Stoica	757	Substance separation by the action of a pulsed IR laser radiation on gas-mixture flows through capillaries
Bogdan Dragnea	765	Field distribution effects in laser driven diffusion through metal capillaries
J. Misiewicz, A. Lemiec, K. Jezierski, J. M. Wróbel and B. P. Clayman	775	A classical oscillators model for infrared reflectance spectra of Zn_3P_2
J. Misiewicz	781	The Raman scattering of Zn_3As_2
Harish Bahadur	785	Intercomparison of near infrared bands in natural and cultured quartz crystals
R. Cannia, G. Strazzulla, G. Compagnini and G. A. Baratta	791	Vibrational spectroscopy of ion-irradiated pentacene
M. S. Cafferty	801	Absorption of $LiIO_3$ in the infrared for the ordinary direction of propagation
R. Schönberger, A. Prückl, E. V. Pechen, V. B. Anzin, B. Brunner and K. F. Renk	807	Narrow-band far-infrared interference filters with high-T_c superconducting reflectors
Guoquan Dong and Zhengzhi Li	813	Monte-Carlo simulation study on the infrared radiance statistics of bare ground terrain
Rudolf Richter	817	Derivation of temperature and emittance from airborne multispectral thermal infrared scanner data
Forthcoming Conferences	i	

Number 7

Research Papers

J. W. Beeman and E. E. Haller 827 Ge:Ga photoconductor arrays: design considerations and quantitative analysis of prototype single pixels

A. Rogalski, R. Ciupa and H. Zogg 837 Computer modeling of carrier transport in PbSnSe photodiodes

O. M. Bulashenko, A. G. Kollyukh and V. A. Morozhenko 847 Anisotropic and polarized intraband light emission of hot electrons

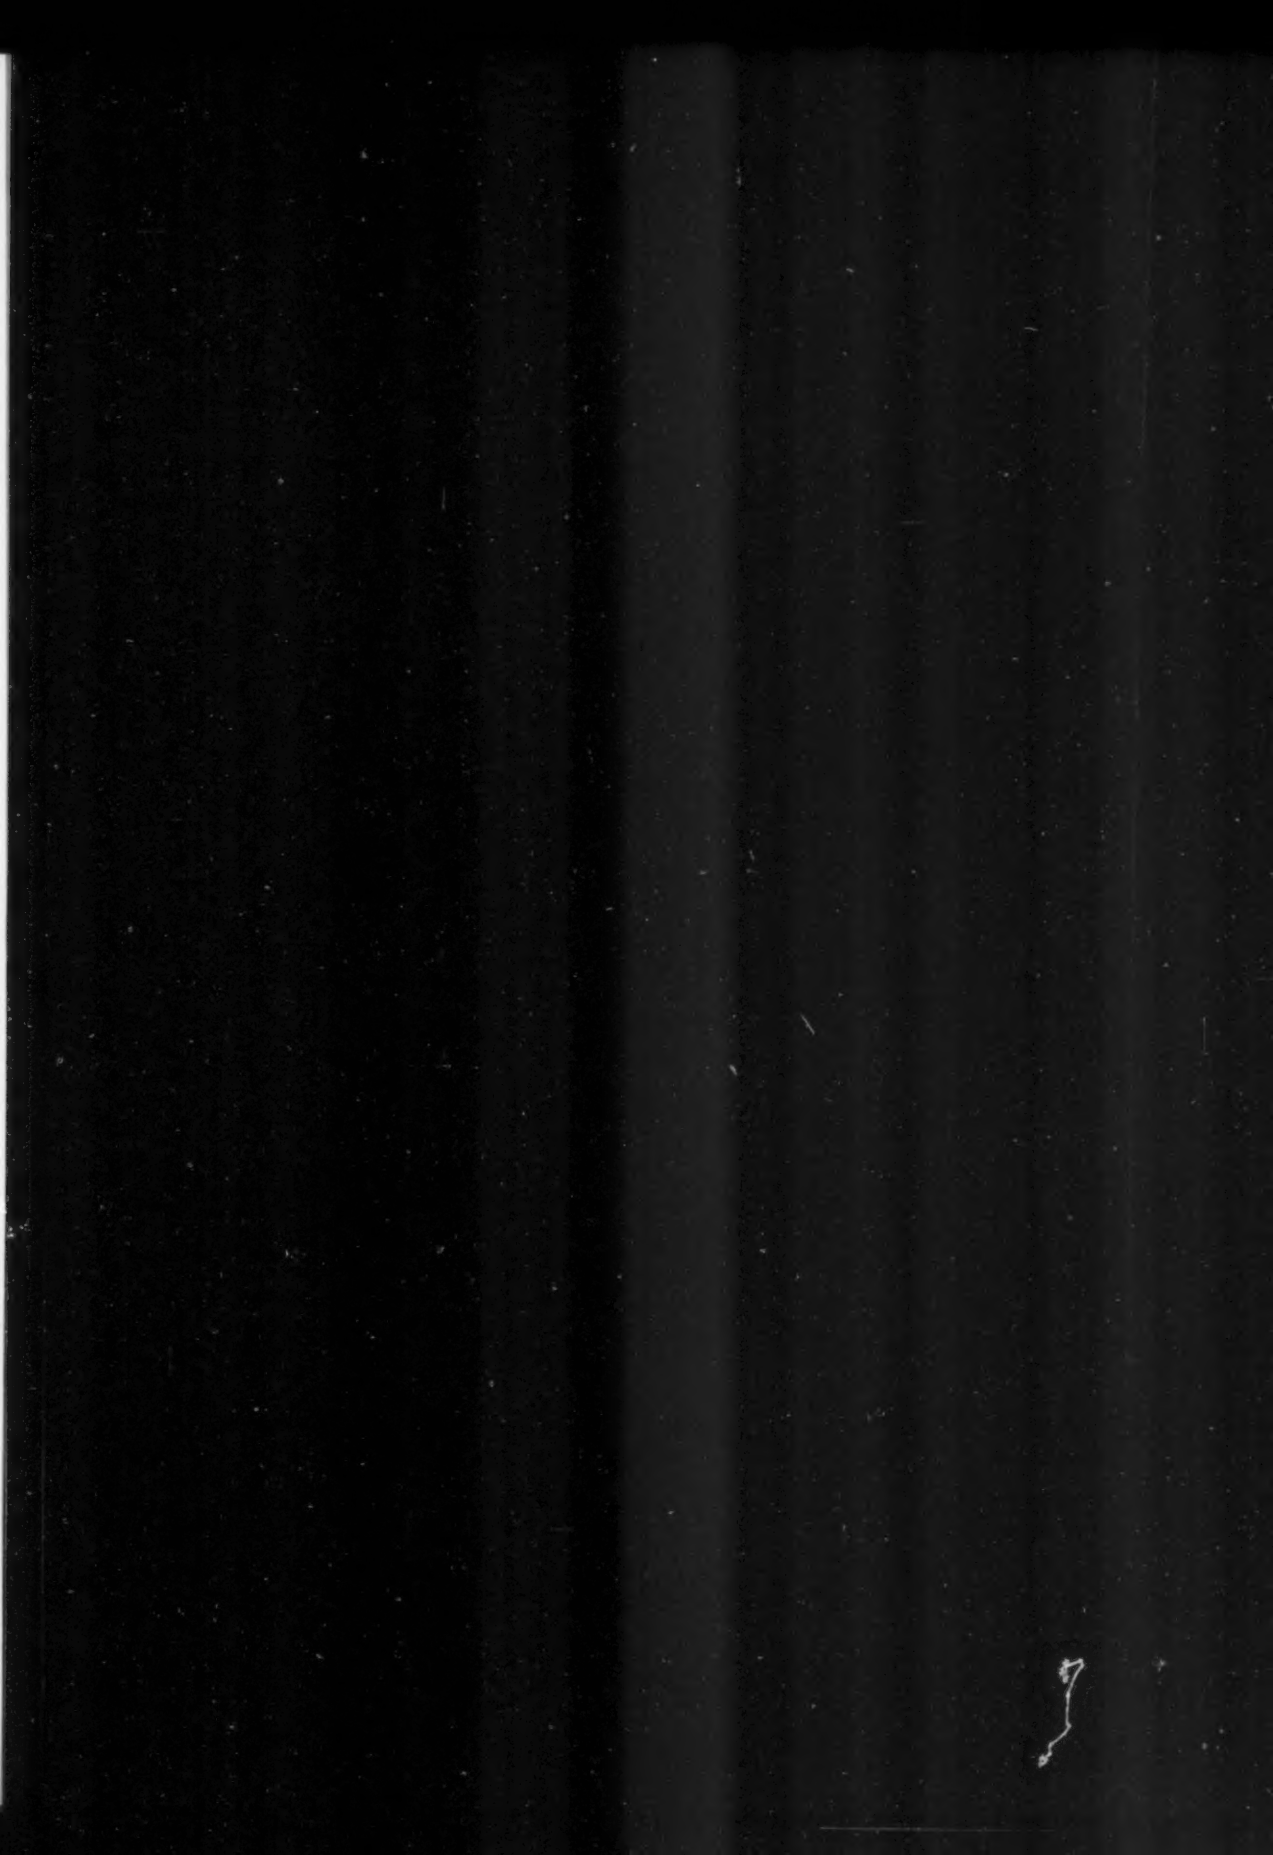
G. Carelli, A. Moretti, D. Pereira and F. Strumia 855 Characterization and frequency measurement of a new far infrared laser line from CH_2F_2

P. J. King, B. W. James, W. Wright and L. B. Whitbourn 859 Resonant array input couplers for optically pumped FIR lasers

F. A. Pepe, R. Brodbeck, D. P. Scherrer, G. N. Schenker, D. Bhend, E. Zimmermann and F. K. Kneubühl 863 Liquid-helium cooled scanning far-infrared Fabry–Perot interferometer for astronomical observations with a balloon-borne telescope

Uri P. Oppenheim, Mary G. Turner and W. L. Wolfe 873 BRDF reference standards for the infrared

S. G. Dolinchuk, N. E. Kornienko and V. I. Zadorozhnii 881 Noncritical vectorial phase matchings in nonlinear optics of crystals and infrared up-conversion

N. N. Filippov, M. V. Tonkov and J.-P. Bouanich 897 Semiclassical line mixing analysis in the first overtone band of CO compressed by N_2


Forthcoming Conferences i
